Author comment on "Submarine landslide source modeling using the 3D slope stability analysis method for the 2018 Palu, Sulawesi, tsunami" by Chatuphorn Somphong et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-170-AC2>, 2021

The authors appreciate the reviewer's compliments and constructive comments. They have greatly improved and polished the content of this article. The authors intend to improve the quality and readability of Figures 1, 4, 5, 6, 7, and 8 in the revised version. The topography (onshore, offshore) and inundation area will be more visible and clarified in Figure 9c.
