Doris Hermle et al.

Author comment on "Timely prediction potential of landslide early warning systems with multispectral remote sensing: a conceptual approach tested in the Sattelkar, Austria" by Doris Hermle et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-18-AC3>, 2021

We thank Sigrid Roessner for her thoughtful comments and expend efforts towards improving our manuscript. We gladly consider the suggested changes in our point-by-point response to all her comments we are currently working on.
