Referee comment on "Towards using state-of-the-art climate models to help constrain estimates of unprecedented UK storm surges" by Tom Howard and Simon David Paul Williams, Nat. Hazards Earth Syst. Sci. Discuss.,  
<https://doi.org/10.5194/nhess-2021-184-RC2>, 2021

---

I obviously confused 'shape' and 'scale' in my comment. In the second para of the Discussion section it is the scale paramter that causes the largest uncertainty and that seems to be compatble with zero. Sorry for any confusion that may have arisen..
