Lauren Zweifel et al.

Author comment on "Investigating causal factors of shallow landslides in grassland regions of Switzerland" by Lauren Zweifel et al., Nat. Hazards Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/nhess-2021-198-AC1>, 2021

Dear Luigi,

Thank you for reviewing our manuscript and for these encouraging and motivating comments.

We will for sure think about and consider to include a susceptibility map. And of course we will check for relevant literature we might have missed, thank you for pointing this out to us.

Sincerely, Lauren Zweifel on behalf of the Co-Authors
