Author comment on "Hanging glacier monitoring with icequake repeaters and seismic coda wave interferometry: a case study of the Eiger hanging glacier" by Małgorzata Chmiel et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-205-AC1>, 2021

We thank the Reviewer for the detailed and careful review. The Reviewer has raised some important points that lead to the improvement of our study. We have studied the comments carefully to verify our analysis, provide additional details, and clarify our interpretations. We also performed some additional analysis following the Reviewer's suggestions. Please find our point-to-point response in the attached pdf.

Please also note the supplement to this comment:
