Community comment on "Earthquake-induced landslide monitoring and survey by means of InSAR" by Tayeb Smail et al., Nat. Hazards Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/nhess-2021-208-CC3>, 2021

In block V in the 1st Referee reply (see above), the time series analysis has shown that there was no pre-event singularity that would have been able to predict the earthquake (or the induced landslides).
