Comment on nhess-2021-263

Anonymous Referee #1

Referee comment on "Dynamic Risk Assessment of Compound Hazards Based on VFS-IEM-IDM: A Case Study of Typhoon-rainstorm Hazards in Shenzhen, China" by Wenwu Gong et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-263-RC1>, 2021

It is a complete and quality article.

The matrix in Line 237 must be reformatted (see attached file).

The grammar in the article needs to be improved. For example,

Line 30: There are many works discussing the multi-hazard risk assessment and Choi et al. (2021) had reviewed the relevant literature.

=> There are many works discussing the multi-hazard risk assessment which have been reviewed by Choi et al. (2021).

Please also note the supplement to this comment:
