Author comment on "A modeling methodology to study the tributary-junction alluvial fan connectivity during a debris flow event" by Alex Garcés et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-266-AC2>, 2021

Dear Eric

We thank you for your time in reviewing our manuscript. We also thank you for constructive feedback, especially on how to improve our figures. We hope that our changes are in line with your expectations. In the supplement, you will find our reply to each comment.

Kind regards,

Please also note the supplement to this comment:
