Replies to Reviewer #2's comments on "Partitioning the uncertainty contributions of dependent offshore forcing conditions in the probabilistic assessment of future coastal flooding at a macrotidal site ". (nhess-2021-271)

Jeremy Rohmer et al.

Author comment on "Partitioning the contributions of dependent offshore forcing conditions in the probabilistic assessment of future coastal flooding" by Jeremy Rohmer et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-271-AC2>, 2022

We would like to thank Reviewer #2 for the constructive comments. We agree with most of the suggestions and, therefore, we have modified the manuscript to take on board their comments. In the attached document, we recall the reviews (in italics) and we reply to each of the comments in turn (in blue).

Please also note the supplement to this comment:
