Community comment on "Lessons from the 2018–2019 European droughts: a collective need for unifying drought risk management" by Veit Blauhut et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-276-CC7>, 2021

Who says that, you? You can complain to the UN.

Do you have any objections to the very essence of this paper? Drought does not recognize administrative boundaries. If you have no objections to the quality of the paper itself, then please do not post comments here anymore. Bye,bye.
