Author comment on "Brief communication: Key papers of 20 years in *Natural Hazards and Earth System Sciences*" by Animesh K. Gain et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-321-AC2>, 2021

We would like to thank the reviewer for the suggestion of replacing our initial word cloud. As suggested by the reviewer, the revised word cloud will be based on the titles of the published articles for the last 20 years in NHESS, instead of just selected 11 papers. The word cloud will now represent keywords that have been covered mostly in the journal.

- We completely agree with the minor suggestions and revised the manuscript accordingly.
