Author comment on "Travel and terrain advice statements in public avalanche bulletins: a quantitative analysis of who uses this information, what makes it useful, and how it can be improved for users" by Kathryn C. Fisher et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-324-AC2>, 2022

---

We thank the reviewer for taking the time to read our manuscript in detail and providing such detailed and constructive comments. We particularly appreciate the explicit suggestions for how to address the shortcomings and improve the analysis approach and writing. Our responses are included in the attached PDF.

Please also note the supplement to this comment:
