Community comment on "Invited perspectives: A research agenda towards disaster risk management pathways in multi-(hazard-)risk assessment" by Philip J. Ward et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-326-CC2>, 2022

We thank David Bresch for the interactive comment and interesting thoughts. We agree that interoperability is a very important issue, especially for developing models and tools within this realm. Within MYRIAD-EU, the "framework" itself is intended to be broader, providing a set of concrete guidelines for designing multi-risk reduction pathways. We will make sure to clarify both of these points if we are invited to submit a revised version.

Best regards

Philip Ward
