Author comment on "Integrated Seismic Risk Assessment in Nepal" by Sanish
Bhochhibhoya and Roisha Maharjan, Nat. Hazards Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/nhess-2021-354-AC2>, 2022

Thank you very much for your extensive review of our paper including comments and suggestions. A major revision of the paper has been carried out to take account of all the comments. We believe that during the process, the paper has been significantly improved. We are more than grateful to receive such a detailed examination of our paper. We have sequentially addressed all of the points raised by the referee in each section of the paper. The attached document is the file addressing comments with all the details.

Please also note the supplement to this comment:
