Author comment on "Modelling extreme water levels using intertidal topography and bathymetry derived from multispectral satellite images" by Wagner Luiz Langer Costa et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-387-AC4>, 2022

Dear Matías Dinapoli,

Thank you for your observations regarding our preprint. Your suggestions helped to improve our manuscript.

Please find in the supplement, the answers to all your questions, in detail.

Best Regards,

The Authors.

Please also note the supplement to this comment:
