Fausto Guzzetti

Author comment on "Invited perspectives: Landslide populations – can they be predicted?"
by Fausto Guzzetti, Nat. Hazards Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/nhess-2021-39-AC1>, 2021

I thank the reviewer for the constructive comments. However, the editors of the journal requested a text of no more than 1300 words, a particularly tight limit. To respond correctly and fully to the reviewer's requests, and to fully elaborate on the reviewer's - albeit very interesting! - points and concepts, one will need well over 1300 words. Nevertheless, I will try to make use of the reviewer's comments.
