## **Comment on nhess-2021-39**

Fausto Guzzetti

---

Author comment on "Invited perspectives: Landslide populations – can they be predicted?"  
by Fausto Guzzetti, Nat. Hazards Earth Syst. Sci. Discuss.,  
<https://doi.org/10.5194/nhess-2021-39-AC4>, 2021

---

### **Additional remarks**

In the revised version of the manuscript, I have done the following changes.

I have added 18 new references.

I have corrected the way the list of references was written.

To compensate for a slightly longer text, due to the addition of an entire new paragraph requested by one reviewer, of additional lines of text, and of new citations, I have deleted Figure 1, which was not necessary.

I have checked the language of the manuscript.
