Elco Koks et al.

Author comment on "Brief Communication: Critical Infrastructure impacts of the 2021 mid-July western European flood event" by Elco Koks et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-394-AC4>, 2022

We thank Mr Journée for this extremely valuable comment. We have, however, decided to remove the figure, as it has proven to be difficult to make a proper figure that aligns all the different country-level information. As other studies focus much more on the meteorological and hydrological conditions of this event, we will simply refer to those studies (e.g. Mohr et al., 2022).
