Author comment on "Sensitivity of simulating Typhoon Haiyan (2013) using WRF: the role of cumulus convection, surface flux parameterizations, spectral nudging, and initial and boundary conditions" by Rafaela Jane Delfino et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-400-AC1>, 2022

Dear Referee,

Thank you very much for the overall positive feedback on the submitted manuscript and for giving us the opportunity to submit an improved version of the manuscript. We appreciate the thoroughness and objectiveness of the comments and have addressed the specific concerns raised. And all changes are highlighted in the revised manuscript. All line numbers refer to the revised manuscript with tracked changes.

Please see in the attached file our specific responses and kindly refer to the attached revised manuscript and supplementary file for more details.

Please also note the supplement to this comment:
