Community comment on "Analysis of seismic strain releases related to tidal stress before the 2008 Wenchuan earthquake" by Xuezhong Chen et al., Nat. Hazards Earth Syst. Sci. Discuss., https://doi.org/10.5194/nhess-2021-405-CC6, 2022

Dear Author,

Please include this explanation in the manuscript. For future studies - try to correlate PEQs and NEQs with dip (rake) of the fault.
