Author comment on "The Cambodian Mekong floodplain under future development plans and climate change" by Alexander J. Horton et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2021-65-AC2>, 2021

Dear Sir,

Thank you very much for very constructive comments and suggestions. We found that this will help a lot to improve the manuscript's quality. We will make the revision and clarification accordingly. Especially for climate change, we will include more scenarios although this will take us more time.

Yours sincerely,

Sokchhay Heng
