We thank the reviewer for these positive comments. We agree with the suggestions made by the reviewer and will integrate these into a revised version of the manuscript. Specifically, we will:

- explain the different type of MR earlier in the manuscript to clarify what is shown in figure 1
- add additional relevant references, e.g. publications by McKinley et al., 2020.
- Revise figure 3 to clarify the direction of the proposed process and clarify some of the terminology.
