Julia F. Lockwood et al.

Author comment on "Using high-resolution global climate models from the PRIMAVERA project to create a European winter windstorm event set" by Julia F. Lockwood et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2022-12-AC1>, 2022

Thank you for this constructive and informative review. Since some common points were raised by each referee, we have written our reply in a single document. Please see the attached pdf.

Please also note the supplement to this comment:
