Author comment on "Using high-resolution global climate models from the PRIMAVERA project to create a European winter windstorm event set" by Julia F. Lockwood et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2022-12-AC2>, 2022

Thank you for your thorough review which raises some important points. Since some common points were raised by each referee, we have written our reply in a single document. Please see the attached pdf at <https://doi.org/10.5194/nhess-2022-12-AC1>.
