Author comment on "Temporal evolution of crack propagation characteristics in a weak snowpack layer: conditions of crack arrest and sustained propagation" by Bastian Bergfeld et al., Nat. Hazards Earth Syst. Sci. Discuss.,
<https://doi.org/10.5194/nhess-2022-161-AC2>, 2022

Dear Dr. Bair,

thank you for the positive feedback and useful comments which will improve the manuscript. In the supplemented PDF, we have pasted your comments in blue, our point-by-point responses are given in black.

Please also note the supplement to this comment:
