Maryse Charpentier-Noyer et al.

Author comment on "A methodological framework for the evaluation of short-range flash-flood hydrometeorological forecasts at the event scale" by Maryse Charpentier-Noyer et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2022-182-AC2>, 2022

We thank anonymous referee number 2 for the useful comments about this initial version of the manuscript. We provide hereafter our detailed answers and explanations about the modifications introduced in the revised version of the manuscript (which is already available). Thanks to this revision, we think the manuscript is now much easier to follow.

Please also note the supplement to this comment:
