Preliminary response to RC3

Katy Burrows et al.

Author comment on "Using Sentinel-1 radar amplitude time series to constrain the timings of individual landslides: a step towards understanding the controls on monsoon-triggered landsliding" by Katy Burrows et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2022-21-AC3>, 2022

We thank the reviewer for taking the time to review our paper. We will prepare a full response to all comments made on the manuscript later on in the review process, but in the attached document we provide a preliminary response outlining how we intend to alter the manuscript to address some of the major points raised in this review.

Please also note the supplement to this comment:
