Chiara Varone et al.

Author comment on "PERL: a dataset of geotechnical, geophysical, and hydrogeological parameters for earthquake-induced hazards assessment in Terre del Reno (Emilia-Romagna, Italy)" by Chiara Varone et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2022-240-AC2>, 2022

Dear Referee #2,

Thank you for your comment and suggestions on this manuscript. We will modify the text to better state the problem, also enlarging the state of the art including additional scientific publications on the topic. We will also work to highlight the uniqueness of the dataset and its implications for the scientific community.
