Comment on nhess-2022-35

Weijie Zou et al.

Author comment on "Using a single remote-sensing image to calculate the height of a landslide dam and the maximum volume of a lake" by Weijie Zou et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2022-35-AC2>, 2022

Dear readers:

According to our own check, we found a mistake on our core formula (6). The LB in formula (6) should be replaced by LB', which represents the length of the dam along the riverbed.
