Review on nhess-2022-83

Odin Marc (Referee)

Referee comment on "Earthquake-induced landslides in Haiti: seismotectonic and climatic influences, size-frequency relationships" by Hans-Balder Havenith et al., Nat. Hazards Earth Syst. Sci. Discuss., <https://doi.org/10.5194/nhess-2022-83-RC1>, 2022

My review of the draft is attached.

In my opinion it needs major reworking before acceptable for publication (and I am not even sure that after that it would fit in the scope of the journal).

Sincerely

Please also note the supplement to this comment:
