Author comment on "Fortnight conditioning of historical data to improve short-term precipitation predictions" by Yoshito Hirata and Yoshinori Yamada, Nonlin. Processes Geophys. Discuss., <https://doi.org/10.5194/npg-2022-9-AC2>, 2022

Dear Referee #1,

Thank you very much for providing your insightful comments.

We would like to reply your comments as the attached PDF file.

Especially, please let us know the names of some benchmark stochastic models if we should add them

because we have already included the AR model, the persistence model and the mean prediction model,

which ,we believe, cover the standard benchmark stochastic models.

Yours sincerely,

Yoshito Hirata
