Referee comment on "An EMD-PSO-LSSVM hybrid model for significant wave height prediction" by Gang Tang et al., Ocean Sci. Discuss., https://doi.org/10.5194/os-2021-2-RC2, 2021

This conclusion is very attractive and robust. I believe this work can be improved in technical presentation.

It is noteworthy that the text needs to be edited by a professional with specialized editing skills, paying particular attention to grammar, spelling, and structure. In addition, certain sentences "...EMD model and LSSVM model integrated to enhance wave height prediction." (Page 2, line 101)
