Comment on os-2021-2

Anonymous Referee #2

Referee comment on "An EMD-PSO-LSSVM hybrid model for significant wave height prediction" by Gang Tang et al., Ocean Sci. Discuss.,
<https://doi.org/10.5194/os-2021-2-RC3>, 2021

This paper presents a hybrid algorithm to improve predicted significant wave height, and provides an effective way to predict the significant wave height for the deep-sea area. The conclusion is very attractive and constructive. I think this paper could be published after technical corrections.

It is noted that this paper needs editing by someone with expertise in technical English editing paying particular attention to English grammar, spelling, and sentence structure. In addition, the punctuation of some sentences is misused. "Integrating an EMD model 100 with an LSSVM model is an important way for enhancing the wave hright prediciton.."□Line 101 on page 2□
