Comment on os-2021-64

Andrew Moore (Editor)

Editor comment on "Assimilating realistically simulated wide-swath altimeter observations in a high-resolution shelf-seas forecasting system" by Robert R. King and Matthew J. Martin, Ocean Sci. Discuss., <https://doi.org/10.5194/os-2021-64-EC1>, 2021

Dear Dr. King,

We are now in receipt of two reviews of your manuscript "Assimilating realistically simulated wide-swath altimeter observations in a high-resolution shelf-seas forecasting system."

Both reviewers agree that your manuscript is well written and conceived, and have provided a thorough list of detailed and thoughtful comments and suggestions for your consideration.

Please respond in detail to all the reviewer comments, questions and concerns when preparing a revised manuscript.

Yours sincerely

Andrew Moore
