Chief editor comment on "Crustal structure of the East African Limpopo margin, a strike-slip rifted corridor along the continental Mozambique Coastal Plain and North Natal Valley" by Mikael Evain et al., Solid Earth Discuss., <https://doi.org/10.5194/se-2020-209-CEC1>, 2021

The editors handling se-2020-209 have followed the discussion above. We would like to stress that Solid Earth encourages an open and constructive discussion of preprints, to stimulate further deliberation and thus help bring the work in preprints forward. We place strong value on a professional and polite tone in all debates and ask to refrain from personal criticisms. While we do not currently have separate guidelines for community comments, some guidance might be had from these two websites: https://www.solid-earth.net/policies/obligations_for_referees.html and https://www.solid-earth.net/peer_review/interactive_review_process.html
