Comment on se-2021-109

Pär Gramh (Referee)

Referee comment on "Multi-disciplinary characterizations of the Bedretto Lab - a new underground geoscience research facility" by Xiaodong Ma et al., Solid Earth Discuss., <https://doi.org/10.5194/se-2021-109-RC3>, 2021

Attached are further review comments from my colleague PhD Robert Earon who is a specialist hydrogeology at the Swedish Nuclear Fuel and Waste Management Co. (SKB). As a Referee I think all his comments are valid and can be useful. But do as you please with this bonus review. Best wishes /Pär
