Chiara Colombero et al.

Author comment on "Surface-wave tomography for mineral exploration: a successful combination of passive and active data (Siilinjärvi phosphorus mine, Finland)" by Chiara Colombero et al., Solid Earth Discuss., <https://doi.org/10.5194/se-2021-121-AC2>, 2022

We are grateful to the reviewer for the positive feedback on the manuscript.

We fully agree on the potentialities of this robust and automatic workflow for future mineral exploration applications in a wide variety of geological contexts.

We have now slightly revised the paper to improve the quality of the manuscript following the comments and fruitful suggestions of another reviewer.
