Editor comment on "Thermal non-equilibrium of porous flow in a resting matrix applicable to melt migration: a parametric study" by Laure Chevalier and Harro Schmeling, Solid Earth Discuss., <https://doi.org/10.5194/se-2021-149-EC1>, 2022

Dear Laure Chevalier and Harro Schmeling,

Both reviewers have raised concerns about the analysis and presentation of the results in the manuscript, and they have made some good points on how these could be improved. Please address these points in your final response.

Best,
Juliane Dannberg
