Dario Zampieri et al.

Author comment on "Geodynamic and seismotectonic model of a long-lived transverse structure: The Schio-Vicenza Fault System (NE Italy)" by Dario Zampieri et al., Solid Earth Discuss., <https://doi.org/10.5194/se-2021-29-AC1>, 2021

We thank Prof. Tavarnelli for the thorough review of the manuscript. We followed his suggestion modifying accordingly the text. In particular, all the suggested references have been added and the example of the Olevano-Antrodoco fault has been inserted in the discussion. More detailed answers to his questions are given in the attached file.

Dario Zampieri, Paola Vannoli and Pierfrancesco Burrato
