Author comment on "Late Quaternary faulting in southern Matese (central Italy): implications for earthquake potential in the southern Apennines" by Paolo Boncio et al., Solid Earth Discuss., <https://doi.org/10.5194/se-2021-73-AC2>, 2021

---

We thank the Reviewer for the detailed review.

We are happy to improve the manuscript following constructive suggestions. Some criticisms have been rebutted on the basis of explained motivations and data. Other criticisms cannot be accepted because unmotivated, or due to misunderstanding of our writing and figures.

The point by point response to the Reviewer's comments is given in the attached file.

Best Regards,

Paolo Boncio on behalf of all co-authors.
