Frank Pazzaglia (Editor)

Editor comment on "Late Quaternary faulting in southern Matese (central Italy): implications for earthquake potential in the southern Apennines" by Paolo Boncio et al., Solid Earth Discuss., <https://doi.org/10.5194/se-2021-73-EC3>, 2021

The AE thanks the reviewer for the general, and specific comments on the marked up manuscript. All of the suggestions are very constructive and will help improve a revised manuscript.
