Author comment on "Crustal structure of the Volgo–Uralian subcraton revealed by inverse and forward gravity modelling" by Igor Ognev et al., Solid Earth Discuss.,
<https://doi.org/10.5194/se-2021-98-AC3>, 2021

Dear reviewer,

there is a correction for our response to your minor comment on l.165 & 208. We use Eq.(4) to calculate the densities of tesseroids according to their middle depth, not the bottom.

Thank you for your consideration,

Best regards,

Igor Ognev.
