Comment on se-2021-99

Susanne Buiter

Chief editor comment on "Late Cretaceous – early Palaeogene inversion-related tectonic structures at the NE margin of the Bohemian Massif (SW Poland and northern Czechia)" by Andrzej Głuszyński and Pawel Aleksandrowski, Solid Earth Discuss., <https://doi.org/10.5194/se-2021-99-CEC1>, 2021

The editors handling this manuscript would like to thank the reviewers for their insightful and constructive feedback and suggestions. We ask the authors to carefully consider the requests for citations to older literature, but would like to stress that they are to evaluate which literature to cite and that they are not under any obligation to follow all suggestions by the referees.
