Comment on soil-2020-93

Bas van Wesemael (Editor)

Editor comment on "Quantifying soil carbon in temperate peatlands using a mid-IR soil spectral library" by Anatol Helfenstein et al., SOIL Discuss.,
<https://doi.org/10.5194/soil-2020-93-EC1>, 2021

The authors systematically addressed the comments of the reviewers. I look forward to the revised version.
