Editor comment on "The distribution of phosphorus from phosphorus derived materials to different soil fractions determines the phosphorus availability in the soil" by Yuan Wang et al., SOIL Discuss., <https://doi.org/10.5194/soil-2021-127-EC1>, 2022

Dear Authors,

I have completed my evaluation of your manuscript, after your reply to reviewers comments. Your replies have been addressed very carefully, but the criticisms were hard and require a major revision of your paper. As I wrote in the previous evaluation, I invite you to resubmit your manuscript incorporating all revisions you suggested in the replies. Please resubmit your revised manuscript soon.

When revising your manuscript, please consider all issues mentioned in the reviewers' comments carefully. Please note that your revised submission may need to be re-reviewed, due to the strong criticisms arisen by the reviewers.

Kind regards,

Luisella Celi
