David Hobson et al.

Author comment on "The effect of tillage depth and traffic management on soil properties and root development during two growth stages of winter wheat (*Triticum aestivum* L.)" by David Hobson et al., SOIL Discuss., <https://doi.org/10.5194/soil-2021-129-AC1>, 2022

Dear referee,

On behalf of the authors, I would like to thank the reviewer for their constructive feedback on the article. I will review the figures and axis as suggested. A full review of the results and discussion will be provided in the second draft with the aim of providing a clearer picture on both tillage and traffic treatments.

Kind regards,

David
