Author comment on "Deforestation effects on soil erosion rates and soil physicochemical properties in Iran: a case study of using fallout radionuclides in a Chernobyl contaminated area" by Maral Khodadadi et al., SOIL Discuss., <https://doi.org/10.5194/soil-2021-2-AC1>, 2021

Dear Reviewer#1,

We would like to thank you for the helpful comments on our manuscript entitled "Deforestation effects on soil erosion rates and soil physicochemical properties in Iran: a case study of using fallout radionuclides in a Chernobyl contaminated area". Indeed, these valuable comments helped us to improve the content of our study.

We carefully considered the comments and revised our manuscript accordingly. Please find below our detailed responses.

Yours sincerely,

Maral Khodadadi on behalf of all the authors.

Please also note the supplement to this comment:
