Comment on soil-2022-1

Maria Jesus Gutierrez Gines (Editor)

Editor comment on "Meso- and microplastic distribution and spatial connections to metal contaminations in highly cultivated and urbanised floodplain soilscares – a case study from the Nidda River (Germany)" by Collin J. Weber et al., SOIL Discuss., <https://doi.org/10.5194/soil-2022-1-EC1>, 2022

I would like to thank the two reviewers and Zacharias Steinmetz for your valuable review of this manuscript.

Given that the reviewers did not identify any major flaws and that they consider the methodology and results appropriate, I recommend to make the major and minor revisions highlighted by the reviewers, in order to make the text more concise and to include the information that is missing.

Best wishes,

Maria Gutierrez

Topical Editor
