Comment on tc-2021-143

Mauri Pelto (Referee)

Referee comment on "Dam type and lake location characterize ice-marginal lake area change in Alaska and NW Canada between 1984 and 2019" by Brianna Rick et al., The Cryosphere Discuss., <https://doi.org/10.5194/tc-2021-143-RC2>, 2021

Detailed comments on this paper are included in the attached file. I encourage the authors to better discuss the nature of Alaskan glacial lakes and the context of the documented changes. The context will add value to the completed inventory.
