Dear reviewer,

Many thanks for your constructive comments. We have followed your suggestions and list our responses in the table below. Thanks for taking the time to review our paper and for giving us positive feedback.

Best regards,

Benjamin Robson (on behalf of the authors)

<tr>
<td>line 14: consider ‘rapidly’ instead of ‘strongly’</td>
<td>This has now been changed</td>
</tr>
<tr>
<td>line 15: ‘less investigated’ is comparative please add to this sentence to complete it.</td>
<td>This has now been changed</td>
</tr>
<tr>
<td>Line 19: it is unclear which glacier you are referring to at this point.</td>
<td>We now make it clear that we are referring to Tapado Glacier</td>
</tr>
<tr>
<td>Line 21: suggest that ‘strong’ not be used as a modifier as it is a bit loose.</td>
<td>We have changed ‘strong’ to ‘increased’</td>
</tr>
<tr>
<td>Line 23: remove ‘in the region’ as it is repetitive from the last sentence.</td>
<td>This has now been changed</td>
</tr>
</tbody>
</table>
Line 35: Better if this paragraph was a bit longer. Thanks for the suggestion, we have added a sentence

Line 40-42: It is not clear why this needs to be an either or situation. We agree that a combination of both theories for rock glacier formation is most likely, but here we just present both schools of thought from the literature.

Line 45: would add an e.g, here as the citation list is not exhaustive This has now been changed

Line 55: The citations are not in the correct order starting with oldest and progressing to youngest. Correction should be applied throughout. Thanks for pointing this out. We have corrected it

Line 82. maybe use ‘agricultural production’ ‘worth’ instead of ‘of’. Also correct typo associated with This has now been changed

Figure 1. The blue stars are hard to read in this figure and the red stars overlap. Consider a white outline of the markers? Caption: Correct typos ‘Location of the La Laguna catchment and of landforms studies in this paper. Three landforms that will be discussed’ in the text are highlighted in (A). We have substantially edited the symbology of this figure so hope it is more readable now. Unfortunately at this scale the red markers do overlap, this is because the location of the mass balance data is approximately the same from year to year, but has a slight shift.

Table 1: ‘For the imagery that were used to produce DEMs, the RMSE values for the Ground Control Points and Tie Points are shown.’ You can remove ‘that were’ This has now been changed

Line 109: ‘The data were” This has now been changed

Line 127: ‘over’ to ‘on’ This has now been changed

Line 132: can cut ‘for this area’ This has now been changed

Table 2. Would be helpful to signify in the figure by the bottom row is in italics. We have removed the italics

Figure 3. It is difficult to read these lines. This has now been changed
Figure 4. y-axis needs a label.  
Thanks for spotting this, this has now been fixed

Line 351. Remove ‘as’  
This has now been changed

Figure 8. A-A’ (etc.) should be labeled in Figure 1.  
We have added these labels

Line 398. need a ‘.’ here.  
This has now been changed

Line 448. remove ‘as’  
This has now been changed

Line 467. Additionally Anderson et al., 2018 point simply to climate warming as a cause of the transition between debris-covered and rock glaciers  
We have adapted this sentence and added this reference

Line 496. would be helpful to cite who has used this approach in the past.  
We have added in some references here
